Breaching AI Agents & Chatbots

Webinar featuring a live simulation, walking through three real-world AI attack patterns from the hacker's perspective.

- >> A red-team walkthrough of three AI vulnerabilities affecting agents and chatbots
- >> How tool poisoning can introduce hidden instructions and unauthorized behavior
- >> How externally sourced content can carry indirect prompt injection "instructions" into chatbots
- >> How to identify agentic threats and risky behaviors within your AI stack
- >> Runtime guardrails to prevent prompt injection, data exfiltration, and unsafe actions

When: Wednesday, May 20, 2026 @ 11:00 MST

Capture the Flag

Bring your laptops and test your skills to find all the flags, or come willing to learn the principles of penetration testing on a network in which you are allowed to target.

- The environment will be available for **up to 3 hours**.
 - Feel free to drop in anytime while the network is available to try your luck at attacking this environment
- Participating ISC2 members will earn **1 CPE credit per full-hour** of engagement
 - In order to receive CPE credit, please enter your ISC2 Member ID when registering for the event
- These systems need to be tested for load and flaws
 - We need your help to make this the best it can be

When: June 9th

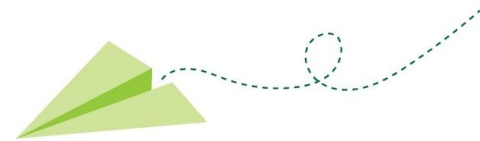

Where: Front Range Community College

2190 Miller Dr.
Longmont, CO
